

SYSTEM READINESS BRIEFING: WEEK 0 ONBOARDING

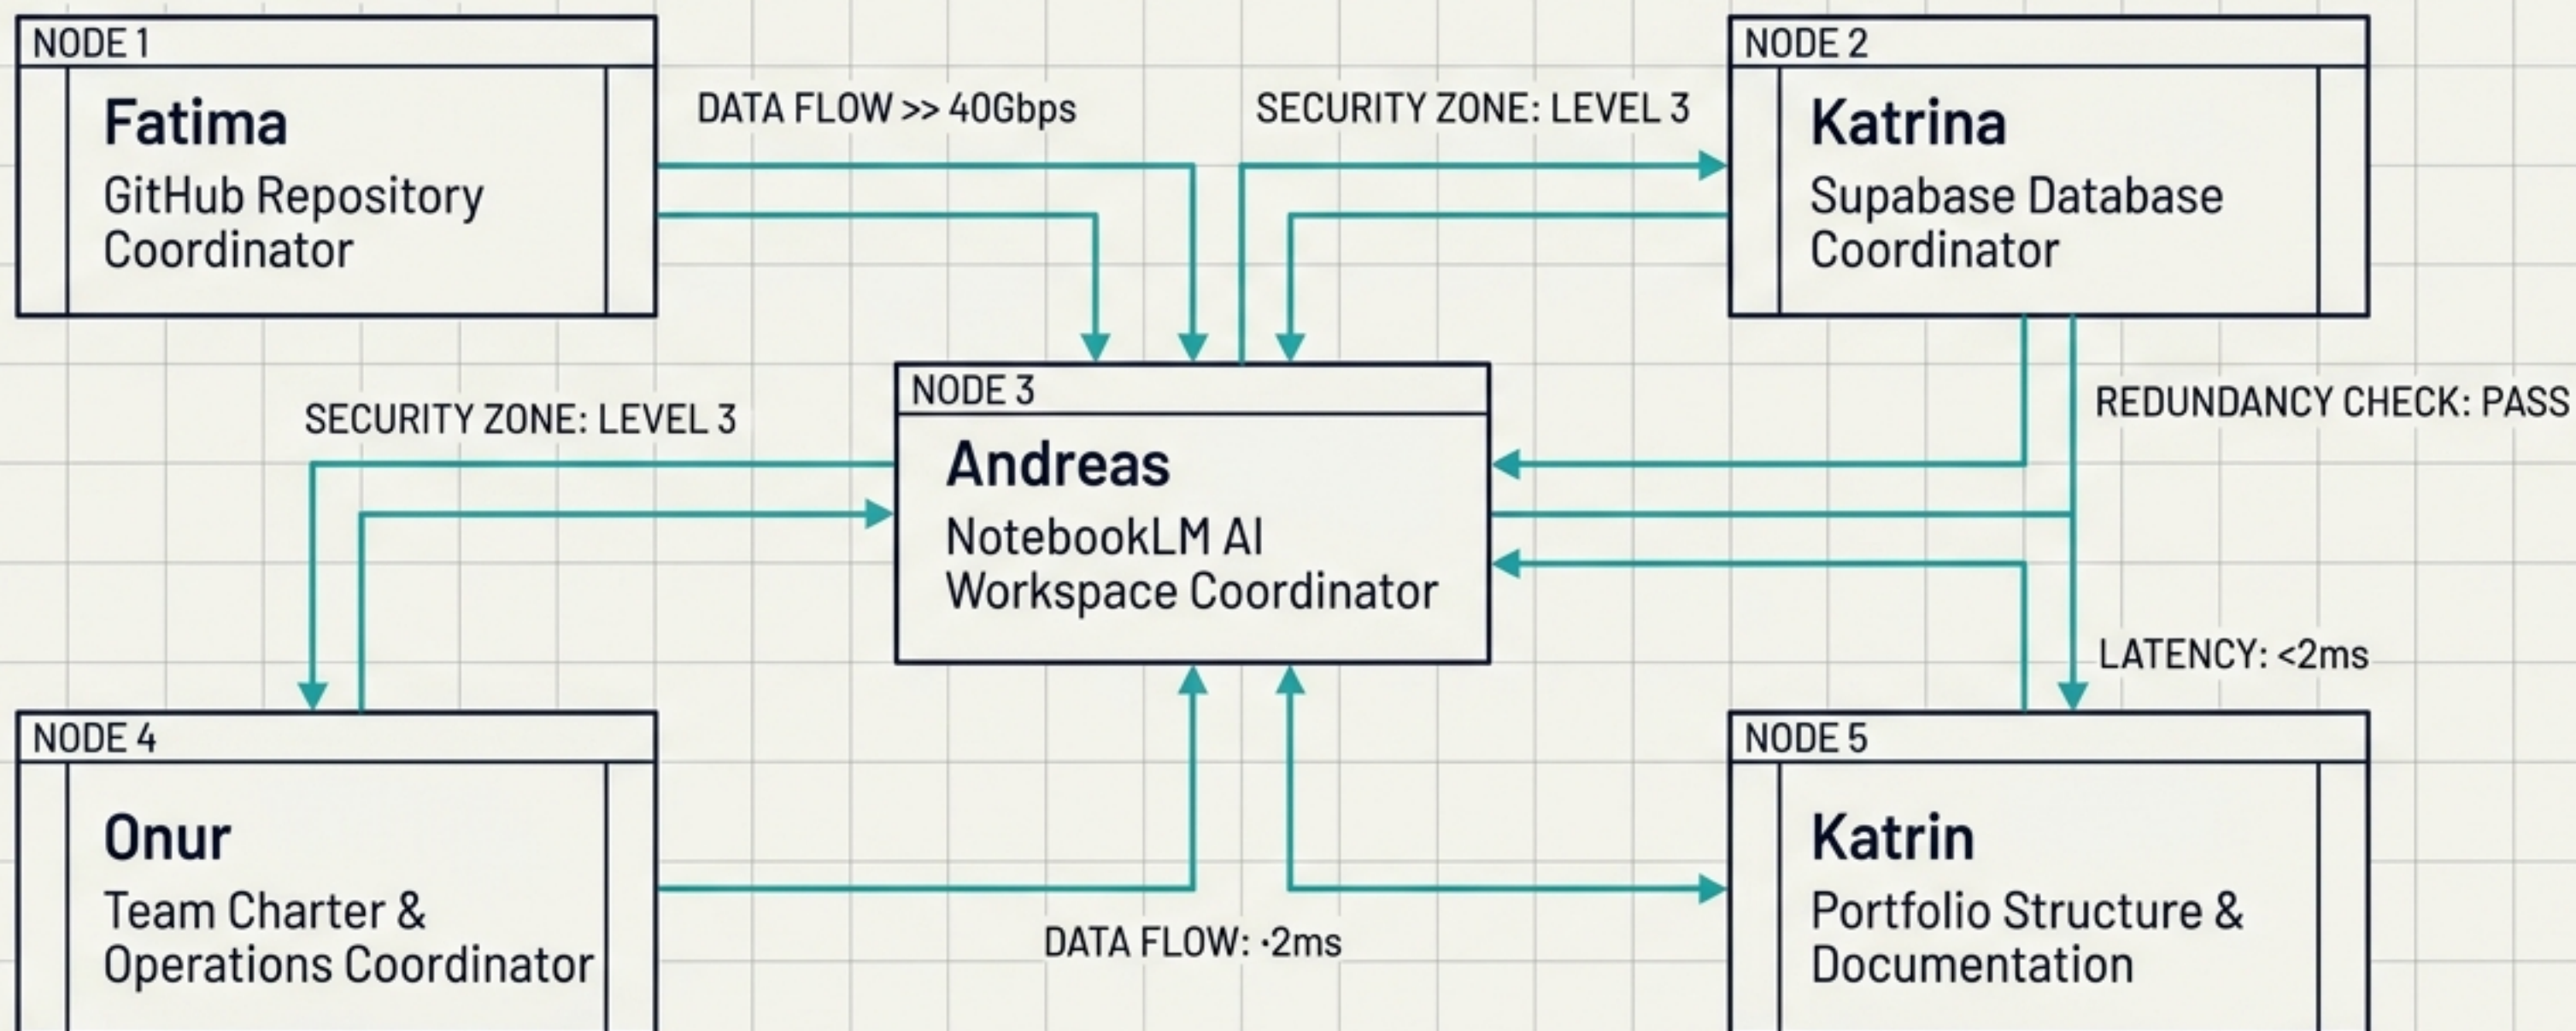

Transitioning from spreadsheet silos
to controlled analytical workflows.

Target Audience: Toomas Kask, IT Director
Unit Designation: Team 6 – ‘Executive Reporting’
Status: Infrastructure Deployed

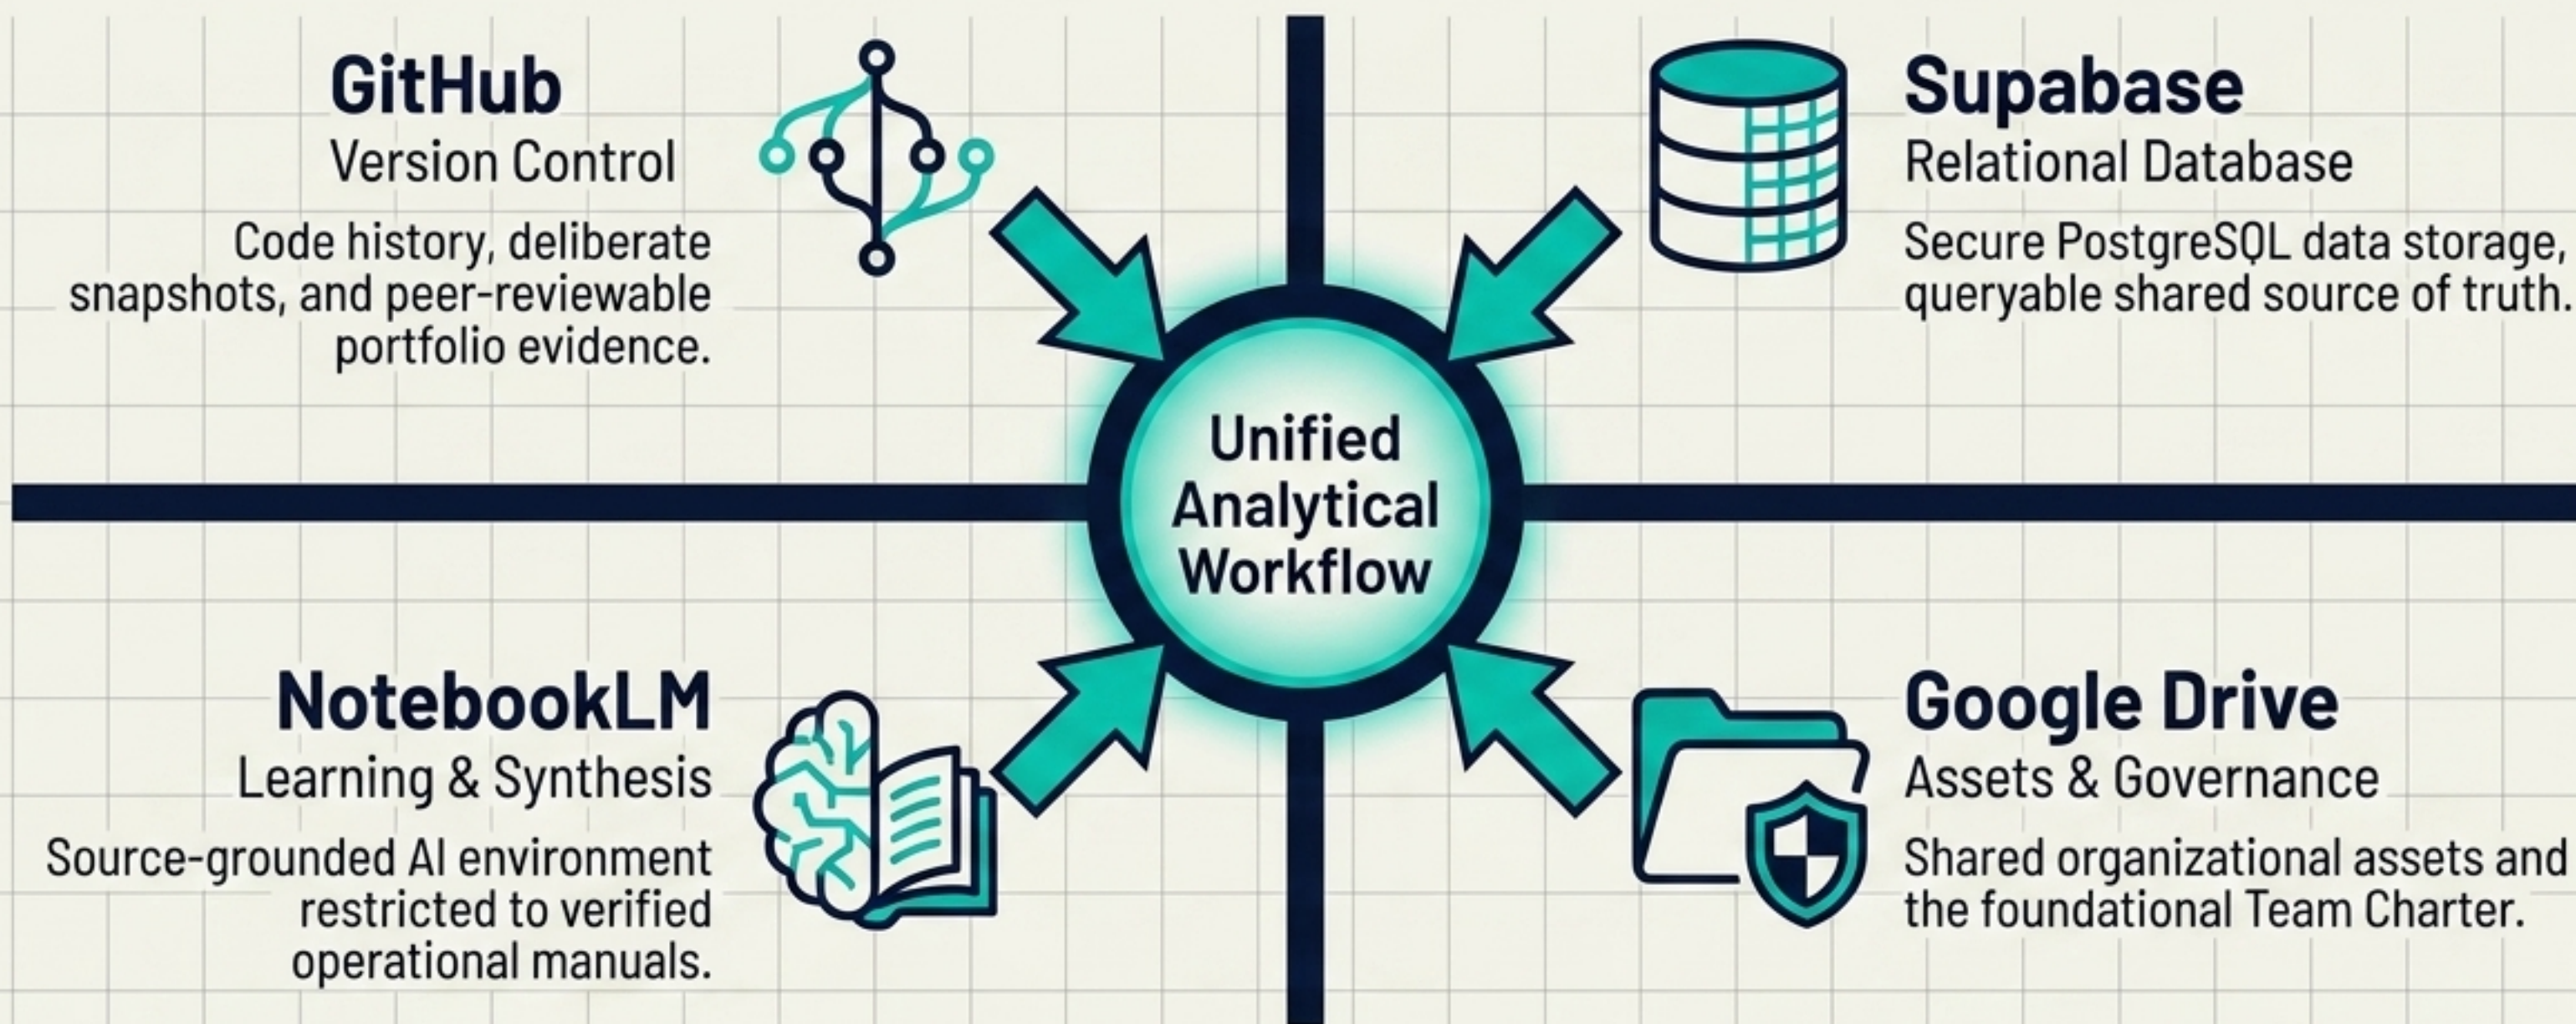

The Human Infrastructure

Network Node Map

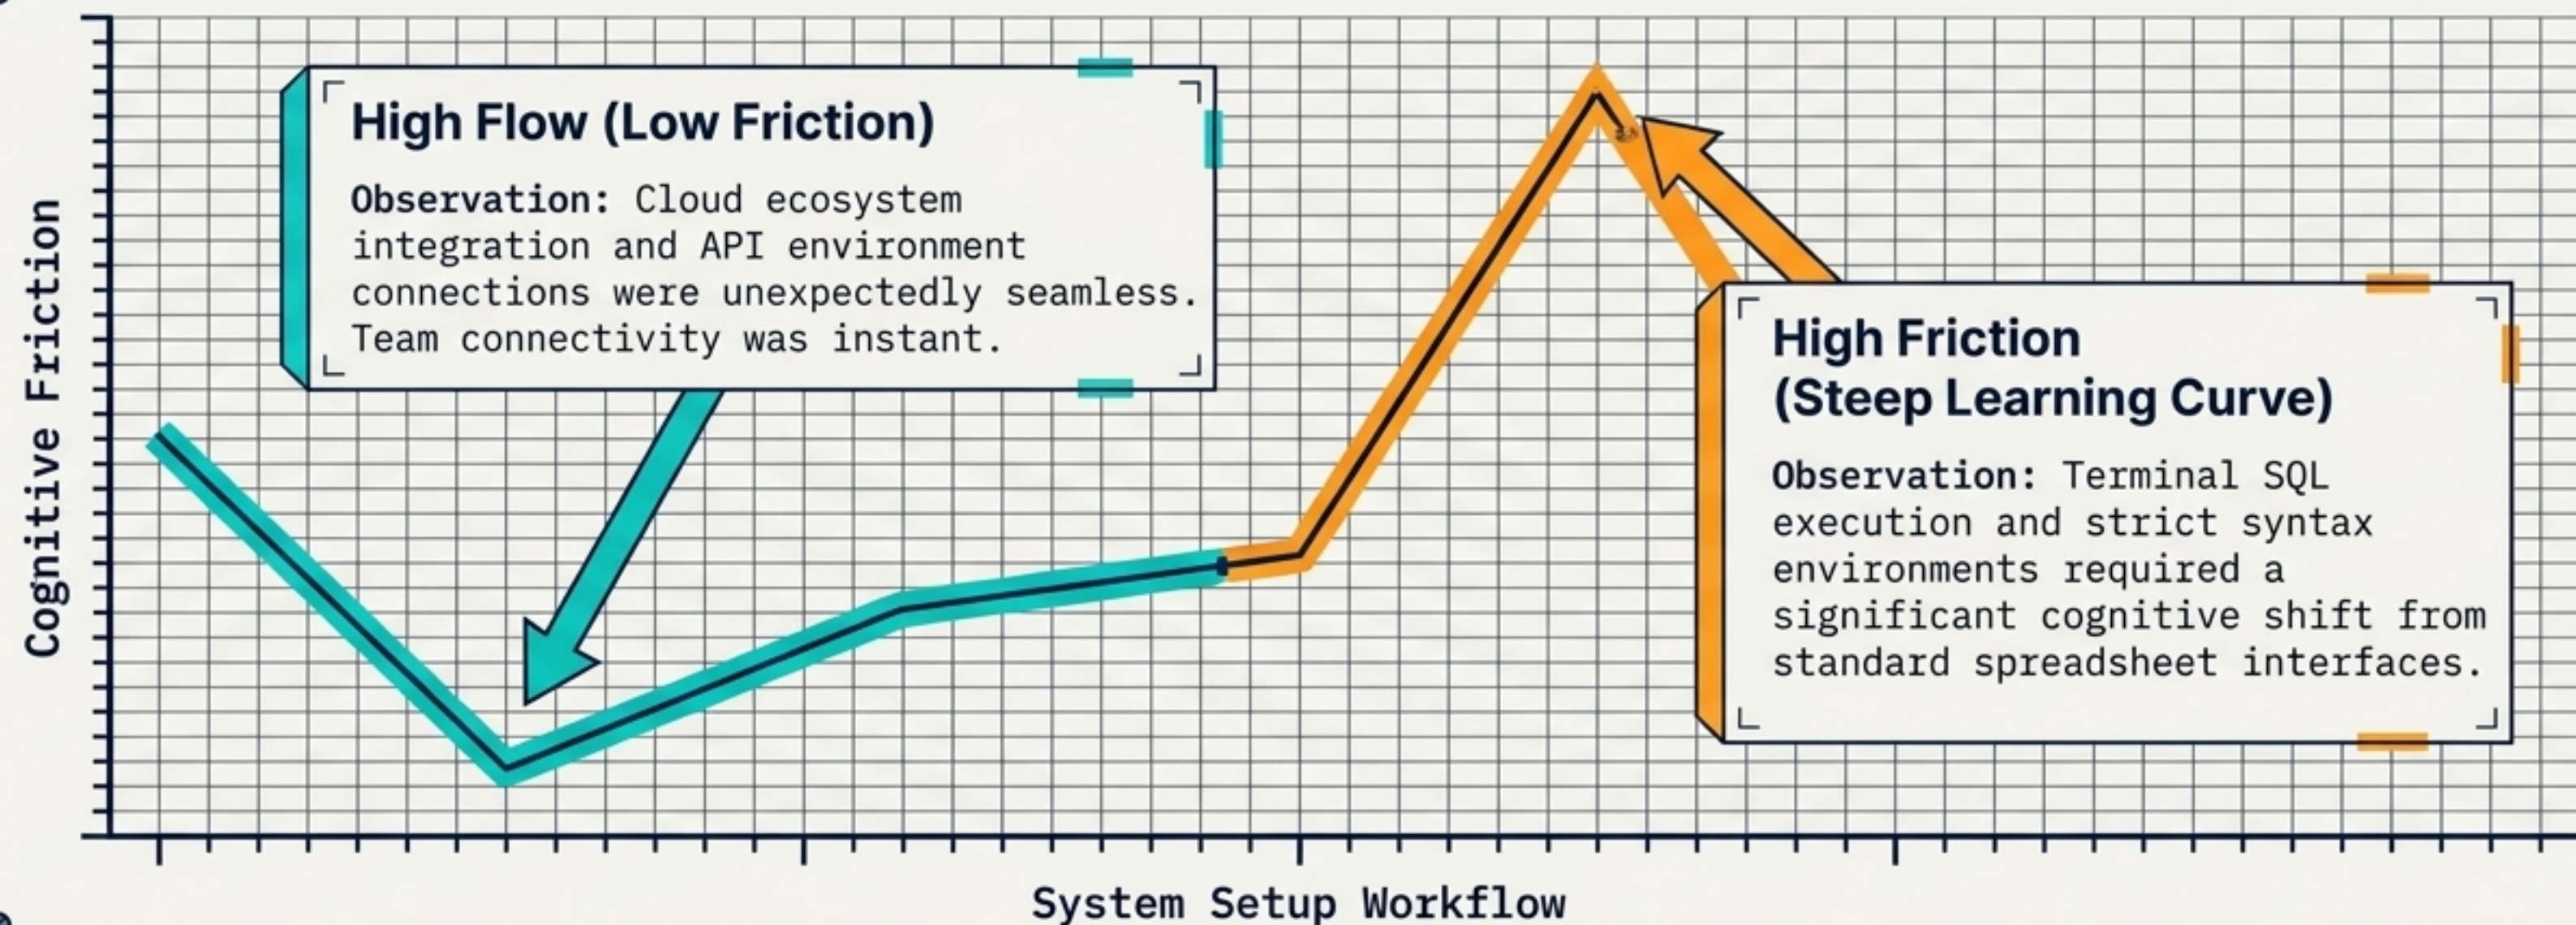

A distributed deployment model ensuring zero single points of failure during the environment build.

Unified Analytical Workflow

Chaotic spreadsheet versions are deprecated. The new standard is inspectable, shared, and repeatable.

Friction & Flow: Initial Diagnostics

The infrastructure connects effortlessly; the true onboarding challenge lies in adapting human workflows to strict terminal logic.

Collaboration Zone

Centralizing all team communication and raw documentation within the Google Ecosystem (Chat, Drive). High visibility, low barrier to entry.

Security Zone

Total isolation of Database Credentials (Supabase) and Source Code execution (GitHub). Strict rule: Zero secrets in repositories.

Core Architectural Recommendation: Centralize daily communication for speed, but completely isolate database credentials to protect system integrity.

Gap Analysis

**Current State:
Setup & Practice Data**

Contains the
team_members
dummy table.

**The Missing Link:
Actual Transactional
& Product Data**

**Future Target:
Business Analysis
& Strategic Insight**

The pipeline is built and verified with practice rows. To move from infrastructure testing to driving UrbanStyle.ltd's business decisions, we require the release of the core sales, customer, and product datasets.

Operational Readiness Confirmed

- ✓ [VERIFIED] Shared Database Instantiated
- ✓ [VERIFIED] Traceable Version Control Online
- ✓ [VERIFIED] Team Charter & Communication Secured
- ✓ [VERIFIED] AI Synthesis Workspace Grounded

The foundations are set. Team 6 'Executive Reporting' is standing by for Week 1 data deployment.
